## Regulatory Information

### FCC Information

Please take attention that changes or modification not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

FCC compliance: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

### FCC Conditions

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- This device may not cause harmful interference.
- This device must accept any interference received, including interference that may cause undesired operation.

### EU Conformity Statement

This product and - if applicable - the supplied accessories too are marked with "CE" and comply therefore with the applicable harmonized European standards listed under the EMC Directive 2014/30/EU, LVD Directive 2014/35/EU, the RoHS Directive 2011/65/EU.

2012/19/EU (WEEE directive): Products marked with this symbol cannot be disposed of as unsorted municipal waste in the European Union. For proper recycling, return this product to your local supplier upon the

purchase of equivalent new equipment, or dispose of it at designated collection points. For more information see: <http://www.recyclethis.info> .

2006/66/EC (battery directive): This product contains a battery that cannot be disposed of as unsorted municipal waste in the European Union. See the product documentation for specific battery information. The battery is marked with this symbol, which may include lettering to indicate cadmium (Cd), lead (Pb), or mercury (Hg). For proper recycling, return the battery to your supplier or to a designated collection point. For more information see: <http://www.recyclethis.info> .

### **Industry Canada ICES-003 Compliance**

This device meets the CAN ICES-3 (B)/NMB-3(B) standards requirements.

## Preface

This section is to ensure that you can avoid danger or property loss in the process of using the product. Before using the product, please read the user manual carefully and keep it for future reference.

### Data Acquisition

Visit our website (<http://www.hikvision.com/>) for user manuals, application tools and development materials.

### Applicable Model

This manual is applicable to DS-1105KI Network Keyboard.

### Important Clause

Please strictly abide by the applicable laws and regulations for the use and maintenance of monitoring interface. It is illegal to use video monitoring device for illegal purposes, or to explore other people's privacy.

### Symbol Conventions

The symbols that may be found in this document are defined as follows.

Symbol	Description
 <b>Danger</b>	Indicates a hazardous situation which, if not avoided, will or could result in death or serious injury.
 <b>Caution</b>	Indicates a potentially hazardous situation which, if not avoided, could result in equipment damage, data loss, performance degradation, or unexpected results.
 <b>Note</b>	Provides additional information to emphasize or supplement important points of the main text.

### Operation Convention

The following operations may be found in this document are defined as follows.

Operation	Description
Press Number + REGION	<ul style="list-style-type: none"> <li>• Press a numeric button and REGION button to select a region.</li> <li>• Number represents region ID. Go to region menu for the ID.</li> </ul>
Press Number + WIN	<ul style="list-style-type: none"> <li>• Press a numeric button and WIN button to select a sub-window.</li> <li>• In video wall mode, if the monitor is divided in to multiple windows, the number represents sub-window ID.</li> </ul>
Press Number + MON	<ul style="list-style-type: none"> <li>• If device is video wall or decoder:                             <ul style="list-style-type: none"> <li>• Press a numeric button and MON button to select a monitor.</li> <li>• Number represents monitor ID. Go to video wall client for the ID.</li> </ul> </li> <li>• If device is video recorder:                             <ul style="list-style-type: none"> <li>• Press a numeric button and MON button to select an output channel.</li> <li>• Number represents output channel ID. Go to <b>Keyboard → Channel → Output Channel</b> for the ID.</li> </ul> </li> </ul>
Press Number + CAM	<ul style="list-style-type: none"> <li>• Keyboard mode:                             <ul style="list-style-type: none"> <li>• Press a numeric button and CAM button to select an output channel.</li> <li>• Number represents input channel ID. Go to <b>Keyboard → Channel → Input Channel</b> for the ID.</li> </ul> </li> <li>• HikCentral/iSecure mode:                             <ul style="list-style-type: none"> <li>• Press a numeric button and CAM button to select a camera.</li> <li>• Number represents camera ID. Check camera ID in resource list.</li> </ul> </li> </ul>
Press Number + CAM-G	<ul style="list-style-type: none"> <li>• Press a numeric button and CAM-G button to select an input channel group.</li> <li>• Number represents input channel group ID. Go to <b>Keyboard → Channel → Camera Group</b> for the ID.</li> </ul>
Press Number + MACRO	<ul style="list-style-type: none"> <li>• Press a numeric button and MACRO button to select a macro.</li> <li>• Number represents macro ID. Go to <b>Keyboard → Macro</b> for the ID.</li> </ul>
Press Number + MULT	<ul style="list-style-type: none"> <li>• Press a numeric button and MULT button to divide monitor.</li> <li>• Number represents sub-window quantity.</li> </ul>
Press Number + SCENE	<ul style="list-style-type: none"> <li>• Press a numeric button and SCENE button to switch video wall scene.</li> <li>• Number represents scene ID. Check the ID in video wall mode.</li> </ul>

## Safety Instructions

### Danger

- This equipment is not suitable for use in locations where children are likely to be present.
- Do not ingest battery. Chemical burn hazard!
- This product contains a coin/button cell battery. If the coin/button cell battery is swallowed, it can cause severe internal burns in just 2 hours and can lead to death.
- Keep new and used batteries away from children.
- If the battery compartment does not close securely, stop using the product and keep it away from children.
- If you think batteries might have been swallowed or placed inside any part of the body, seek immediate medical attention.
- CAUTION: Risk of explosion if the battery is replaced by an incorrect type.
- Improper replacement of the battery with an incorrect type may defeat a safeguard (for example, in the case of some lithium battery types).
- Do not dispose of the battery into fire or a hot oven, or mechanically crush or cut the battery, which may result in an explosion.
- Do not leave the battery in an extremely high temperature surrounding environment, which may result in an explosion or the leakage of flammable liquid or gas.
- Do not subject the battery to extremely low air pressure, which may result in an explosion or the leakage of flammable liquid or gas.
- Dispose of used batteries according to the instructions.

### Caution

- The equipment shall not be exposed to dripping or splashing and that no objects filled with liquids, such as vases, shall be placed on the equipment.
- + identifies the positive terminal(s) of equipment which is used with, or generates direct current.  
- identifies the negative terminal(s) of equipment which is used with, or generates direct current.
- No naked flame sources, such as lighted candles, should be placed on the equipment.
- The USB port of the equipment is used for connecting to a mouse, a keyboard, or a USB flash drive only.

## Chapter 1 Product Introduction

DS-1105KI is a network keyboard independently developed by Hikvision. It features in 7-inch full view multi-touch LCD screen and four-dimensional joystick. It supports network access to DVR, DVS, NVR, network camera, network dome, video integrated platform, decoder, iSecure, HikCentral and other platform software, with powerful functions and quick and simple operations. It can be widely used in finance, public security, army, telecommunication, transportation, electric power, education, water conservancy and other fields.

## Chapter 2 Activation

You can activate network keyboard via local menu, SADP client or Web interface.

### 2.1 Local Menu Activation

For the first-time access, you need to activate the network keyboard by setting an admin password.

#### Steps

1. Connect your network keyboard power supply to an electrical outlet, and turn on the network keyboard.  
The activation interface will be popped up automatically.
2. Set password and confirm it.

---

#### **Warning**

We highly recommend you create a strong password of your own choosing (Using a minimum of 8 characters, including at least three of the following categories: upper case letters, lower case letters, numbers, and special characters.) in order to increase the security of your product. And we recommend you reset your password regularly, especially in the high security system, resetting the password monthly or weekly can better protect your product.

---

**Figure 2-1 Activation**

3. Tap **Activate**.

## 2.2 SADP Activation

SADP software is used for detecting the online device, activating the device, and resetting its password.

Get the SADP software from the supplied disk or the official website, and install the SADP according to the prompts.

### Steps

1. Connect your network keyboard power supply to an electrical outlet, and turn on the network keyboard.
2. Run the SADP software downloaded from our website to search the online devices.
3. Check the keyboard status from the device list, and select the inactive keyboard.
4. Enter the new password in the password field, and confirm it.

### Warning

- 8 to 16 characters allowed, including at least two of the following: digits, upper case letters, lower case letters and special characters.
  - **STRONG PASSWORD RECOMMENDED**– We highly recommend you create a strong password of your own choosing (using a minimum of 8 characters, including upper case letters, lower case letters, numbers, and special characters) in order to increase the security of your product. And we recommend you reset your password regularly, especially in the high security system, resetting the password monthly or weekly can better protect your product.
- 

5. Click **Activate**.

## 2.3 Web Activation

After editing the PC and the network keyboard to the same network segment, you can directly log in to the web interface of the network keyboard to activate.

## Chapter 3 Network

Network parameters must be properly configured before you can add network devices and operate the network keyboard over network.

### Steps

1. Go to **System** → **Network** .
2. Configure network parameters.
  - Enable **DHCP** to obtain IP settings automatically.
  - Manually enter IP address, subnet mask, and gateway.
  - Enable **SADP** to search devices, change IP addresses through SADP software.
3. Tap **Save**.

The screenshot displays a configuration interface for network parameters. It includes the following elements:

- DHCP**: A toggle switch that is currently turned off (grey).
- IP Address**: A text input field containing the value 192.168.1.100.
- Subnet Mask**: A text input field containing the value 255.255.255.0.
- Gateway**: A text input field containing the value 192.168.1.1.
- MAC Address**: A text input field containing the value 00:0C:29:00:00:00.
- SSH**: A toggle switch that is currently turned off (grey).
- SADP**: A toggle switch that is currently turned on (green).
- Save**: A blue button located at the bottom right of the form.

**Figure 3-1 Network Parameters**

## Chapter 4 Keyboard

Keyboard mode is mainly applied to small-sized surveillance projects. Network keyboard works as a control center and manages surveillance devices in it.

### 4.1 Login

#### Steps

1. Tap **Keyboard** at home page.

Figure 4-1 Login

2. Enter user name and password.
3. **Optional:** Check **Remember**.
4. Tap **Login**.

---

#### Note

If you enter the wrong password 7 times for administrator or 5 times for operator, the current user account will be locked for 30 minutes.

---

### 4.2 Add Devices

Up to 4000 devices can be added.

#### 4.2.1 Manually Add

#### Steps

1. Go to **Keyboard** → **Device** .

The screenshot shows a mobile application interface titled "Device Management". At the top, there is a home icon on the left and a share icon on the right. Below the title, there are two tabs: "Center Device" (selected) and "IPC/IP Dome". To the right of the tabs are icons for adding (+), deleting (trash), and refreshing (circular arrow), followed by a search bar labeled "Enter keywords" with a magnifying glass icon. The main content is a table with the following columns: ID, Device Type, Device Name, IP/Port, Refresh, Edit, Link, and Delete. There are four rows of device data.

<input type="checkbox"/>	ID	Device Type	Device Name	IP/Port	Refresh	Edit	Link	Delete
<input type="checkbox"/>	1	DEC/DS-6916UD	Embedded mult...	192.168.1.100/8000				
<input type="checkbox"/>	2	DEC/DS-6416HD-	Embedded mult...	192.168.1.101/8000				
<input type="checkbox"/>	3	NVR/DS-7616N-SE	192.168.1.102	192.168.1.102/8000				
<input type="checkbox"/>	4	NVR/DS-7716N-...	192.168.1.103	192.168.1.103/8000				

**Figure 4-2 Device Management**

2. Tap **Center Device** or **IPC/IP Dome** as desired.
3. Tap **+**.
4. Enter device IP address, port, user name, and password.

---

 **Note**

- The device name is obtained automatically or can be configured as required.
- If you enable the stream encryption for the device, you need to enter the verification code when adding the device.

- 
5. Check or uncheck **Add Video Recorder Output**.

---

 **Note**

Check **Add Video Recorder Output**, and the output port type, channel number and other information will be listed in the output port list.

- 
6. Tap **OK**.

**Add Center Device**

ID	<input type="text"/>
Device	<input type="text"/>
IP*	<input type="text" value="192.168.0.1"/>

## 4.2.2 Add in Batches

### Add Online Devices in Batches

You can add the devices with the same user name and password in batches.

#### Steps

1. Go to **Keyboard** → **Device** .

Device Management <span style="float: right;">↗</span>							
Center Device		IPC/IP Dome		+	-	📄	Enter keywords <input style="width: 50px;" type="text"/>

<input type="checkbox"/>	DS-2CD4112F-I	192.168.1.105	8000	+

**Figure 4-6 Online Devices**

3. Check the devices to be added and tap + .
4. Enter user name and password.
5. Tap **Add**.

## Import Input Channels in Batches

The information of added input channel can be generated into an excel file and exported to the USB flash drive for backup.

### Before You Start

Connect an USB flash drive to the network keyboard.

### Steps

1. Go to **Keyboard → Channel** .
2. Export input channel template.
  - 1) Tap  to export an excel file.
  - 2) Edit the file on your computer, like adding or deleting input channels.
  - 3) Copy the file to an USB flash drive and connect it to your network keyboard.
3. Tap  to import input channels.

## 4.3 Local Live View

Preview an input channel in keyboard touchscreen.

### 4.3.1 Preview by Operating Touchscreen

#### Steps

1. Go to **Keyboard → Channel** .
2. Select the channel and tap  to preview.

### 4.3.2 Preview by Operating Keyboard Shortcut

Press the keys of the keyboard to preview the input channel.

#### Steps

1. Press **0+MON**.
2. Preview the channel as desired.
  - Press **Num+CAM** to preview the signal of the corresponding channel.
  - Press **Num+CAM-G** to preview the camera group.
  - Tap  in the touchscreen and select the channel or the camera group as desired to preview.

Figure 4-7 Local Live View

3. You can do the following operations.

- 4-Screen Preview**
- Press **4+MULT** to switch the current image into 4 screens, and tap any screen to preview the images of different cameras.
  - Press **1+MULT** to return the previous image.

**Switch Channels** Press **PREV/NEXT** to switch to the previous or next channel.

**Full Screen** Press **ESC** to switch to the full screen.

**Capture Images** Press the top of the rocker to capture a image.

**Clip Videos** Press  to start clipping and press it again to stop clipping.

4. Press **0+CAM** to stop previewing.

 **Note**

- You can preview the channel with up to 4K resolution.
  - Press **Num+CAM** to control PTZ without previewing images from speed domes.
  - The captured image and the recording can be saved in USB flash drive or uploaded to FTP server. For FTP configuration, see **Storage** .
- 

### 4.3.3 PTZ Control

You can control the added speed dome, like control PTZ movement, turn on/off light, turn on/off wiper, zoom in/out, increase/decrease focus, increase/decrease iris, set/call preset, patrol and pattern.

### General Operation

#### Steps

1. Preview speed dome image.

 **Note**

For detailed steps, see **Preview by Operating Touchscreen** and **Preview by Operating Keyboard Shortcut** .

---

2. Move joystick and press buttons of keyboard to control PTZ.

**Table 4-1 Buttons Description**

Button	Description	Button	Description
LIGHT	Turn on/off light.	WIPER	Turn on/off wiper.
FOCUS+	Increase focus.	FOCUS-	Decrease focus.
IRIS+	Increase iris.	IRIS-	Decrease iris.
ZOOM+	Zoom in.	ZOOM-	Zoom out.
PRESET	Call preset.	PATROL	Call patrol.
PATTERN	Call pattern and start/stop auto-scan.	Joystick	Rotate PTZ.

### Set and Call Preset

You can record the horizontal positions, vertical positions and lens magnification of the preset point by setting a preset point. To quickly monitor a certain target, you can call out the preset position by operating the keyboard.

## Steps

1. Preview speed dome image.

For detailed steps, see ***Preview by Operating Touchscreen*** and ***Preview by Operating Keyboard Shortcut***.

2. Set a preset.

- 1) Tap .
- 2) Tap **Preset**.
- 3) Rotate the joystick to move PTZ to a desired position.
- 4) Tap  to set a preset.

3. Tap  to call the preset.

## Set and Call Patrol

Patrol means that PTZ moves among several presets. PTZ will stay in a preset for a duration before moving on to the next preset.

## Steps

1. Preview speed dome image.

For detailed steps, see ***Preview by Operating Keyboard Shortcut*** and ***Preview by Operating Touchscreen***.

2. Set a patrol.

- 1) Tap .
- 2) Tap **Patrol**.
- 3) Tap  of a desired patrol.
- 4) Tap **Add Preset** to add presets, including their speed and duration time, in the patrol.
- 5) Tap **OK**.

3. Tap  to call the patrol.

## Set and Call Pattern

Pattern records the movement of the PTZ. You can call the pattern to automatically move the PTZ according to the predefined path.

## Steps

1. Preview speed dome image.

For detailed steps, see ***Preview by Operating Touchscreen*** and ***Preview by Operating Keyboard Shortcut***.

2. Set a pattern.

- 1) Tap .
- 2) Tap **Pattern**.
- 3) Tap  of a desired pattern.
- 4) Tap **OK**.

- 5) Rotate the joystick to control PTZ. The movement will be recorded.
- 6) Tap  to save the pattern.
- 3. Tap  to call the pattern.

## 4.4 Video Wall

### 4.4.1 Video Wall Configuration

#### Configure Region

Divide a video wall into several regions to manage video wall by region.

#### Steps

1. Go to **Keyboard** → **Region** .

ID	Video Wall	Start Coordinate	End Coordinate	Edit	Config	Delete
1	4	Row 1, Column 1	Row 2, Column 2			

**Figure 4-8 Region Management**

Column\*

**Figure 4-9 Add Region**

3. Enter video wall ID, start coordinate, and end coordinate.
4. Tap **OK**.

---

#### Note

- Up to 16 regions can be added.
  - Region size cannot be larger than 6 × 8 (row × column).
-

## Link Output Channel to Video Wall

### Steps

1. Tap  of region to configure.

**Figure 4-10 Region Configuration**

2. Tap  of a grid.
3. Select a decoding device and select its output channel.
4. Tap **OK** to finish setting.

---

 **Note**

Region output channel layout should be the same with the actual video wall.

---

Figure 4-11 Add Output

## 4.4.2 Video Wall Control

### Layout Operation

Select a monitor to open, close, resize, and divide windows.

#### Steps

1. Press **Num+REGION**.
2. Tap to select a monitor.
3. Operate the window as desired.

**Open window** Press **Num+CAM** or **Num+CAM-G** to display an input channel or camera group on the monitor.

**Window roaming** Long press a window, and you can move it.

**Close window** Long press a window, and tap  to close the window.

**Resize window**

- Double tap a window to expand it to cover all the grids it overlays. Double tap the window again to restore it to the previous size.
- Drag the four corners of the window to resize the window.

<b>Divide window</b>	Press <b>Num+MON</b> and press <b>Num+MULT</b> to divide the window.
<b>Expand/ restore sub- window</b>	Press <b>Num+MON</b> , press <b>Num+WIN</b> to select a sub-window, and press <b>F2</b> to expand the sub-window to cover the whole monitor. Press <b>F2</b> again to restore the sub-window.

## Window Operation

Display an input channel or camera group on a monitor.

### Steps

1. Select a monitor to display. Three methods are provided. You are recommended to use the first one.
  - a. Press **Num+REGION** to show monitors on the region and video wall layout.
  - b. Press **Num+MON**. Or tap to select a monitor.
  - a. In iSecure or HikCentral platform, select a wall in the wall list.
  - b. Press **Num+MON**. Or tap to select a monitor.
  - Press **Num+MON**: Select a monitor directly.
2. Select an input channel or camera group to preview.
  - Press **Num+CAM** to preview the input channel.
  - Press **Num+CAM-G** to preview the camera group.
  - Tap  on the upper right corner of the touchscreen and select an input channel to preview.
3. During live view, you can switch live view input channel, capture images, and clip videos.

**Switch Channels** Press **PREV/NEXT** to switch to previous/next online input channel.

**Capture Images** Press the button on the top of joystick to capture a picture.

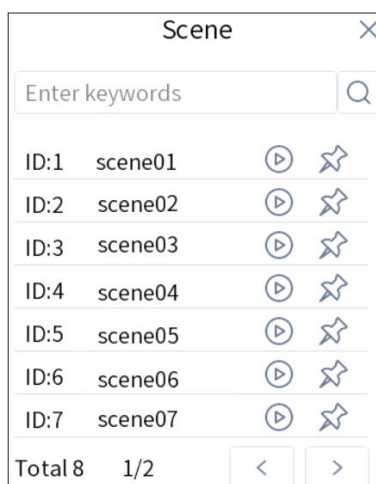

**Clip Videos** Press  to start clipping and press it again to stop clipping.

## Scene Operation

You can switch the scene for a region or video wall.

### Steps

1. Press **Num+REGION**.
2. Select a monitor or window on touchscreen.
3. Select a scene as desired.
  - Tap  on the upper right corner and select a desired scene.

**Figure 4-12 Scene**

**Table 4-2 Icon Description**

Icon	Description
	Switch scene.
	Save scene.

- Press **Num+SCENE** to switch scenes.

### 4.4.3 PTZ Control

You can control the added speed dome, like control PTZ movement, turn on/off light, turn on/off wiper, zoom in/out, increase/decrease focus, increase/decrease iris, set/call preset, patrol and pattern.

#### Steps

1. Display speed dome image on video wall. For detailed steps, see **Window Operation** .
2. Control PTZ. For detailed steps, see **PTZ Control** .

### 4.4.4 Macro

You can execute a series of continuous actions in sequence by calling a macro. Steps of setting group and macro are the same, we take setting and calling macro as the example to describe the steps.

#### Steps

1. Go to **Keyboard** → **Macro** .
2. Tap  .

Supported Keys: REGION, MON, CAM, CAM-G, WIN, MULT, SCENE, PRESET, PATROL, PATTERN

**Figure 4-13 Create Macro**

3. Enter macro name.
4. Press keyboard buttons to enter commands.

---

 **Note**

You can add up to 256 keys in one macro. A number may contain several keys, e.g., 369 contains 3 keys. A functional button is one key.

---

5. Tap **Save**.
6. Press **Num+MACRO** to call the macro.

## 4.5 Playback

### 4.5.1 Local Playback

Play videos on the touchscreen.

#### Instant Playback

Play videos in 3/5/10/15 minutes.

#### Steps

1. Start local live view. For detailed steps, see *Preview by Operating Touchscreen* and *Preview by Operating Keyboard Shortcut*.
2. Press ▶ to start playing the video within 5 minutes. Or tap ⏮, tap **Instant**, and select the playback time.

## Playback by Time

### Steps

1. Start local live view. For detailed steps, see *Preview by Operating Touchscreen* and *Preview by Operating Keyboard Shortcut* .
2. Tap  .
3. Tap **By Time**.
4. Select a day in calendar.

## Playback Control

During playback, you can clip videos, capture images, control playback speed, etc.

Before the operation, you need to connect a USB flash drive or configure keyboard FTP settings. Clipped videos and captured pictures will be saved to USB flash drive or FTP server. For steps of storage configuration, see *Storage* .

**Table 4-3 Button Description**

Button	Description	Button	Description
Time bar	Drag time bar to quickly locate on a certain time to play.		Pause/resume playback.
ESC	Stop playback.	Joystick	<ul style="list-style-type: none"> <li>• Push it to the left to slow down.</li> <li>• Push it to the right to speed up.</li> <li>• Rotate it clockwise to jump forward for 30 seconds.</li> <li>• Rotate it anticlockwise to back forward for 30 seconds.</li> </ul>

### 4.5.2 Video Wall Playback

Play videos on video wall.

### Instant Playback

Play videos in 3/5/10/15 minutes.

## Steps

1. Start video wall live view. For detailed steps, see **Window Operation** .
2. Press ▶ to start playing the video within 5 minutes. Or tap ⏮, tap **Instant**, and select the playback time.

## Playback by Time

### Steps

1. Start video wall live view. For detailed steps, see **Window Operation** .
2. Tap ⏮, tap **By Time**, and select a day in calendar.

## Playback Control

For detailed steps, see **Playback Control** .

Capturing, clipping, recording, jumping forward or backward for 30 seconds are not supported in **Video Wall Playback**.

---

## 4.6 Channel Management

### 4.6.1 Edit Channel

We take editing input channel as the example to describe the steps.

#### Steps

1. Go to **Keyboard** → **Channel** .
2. Tap ✎ of input channel/output channel to edit.

**Figure 4-14 Edit Input Channel**

3. Edit parameters.

**ID**

The unique identification for input channel. It is valid in local and video wall live view mode.

### Stream

The stream to preview in local and video wall live view mode.

### Protocol

It is valid for video wall preview.

4. Tap **OK**.

## 4.6.2 Output Channel

When adding decoders or video recorders, their output channels will be added and displayed in output channel list. You can press **Num+MON** to operate an output channel, and the number refers to output channel ID. Video wall also need to link to these output channels.

The screenshot shows a web interface titled "Channel Management". At the top, there are tabs for "Input Channel", "Output Channel" (which is selected), and "Camera Group". To the right of the tabs is a search bar labeled "Enter keywords" with a magnifying glass icon. Below the tabs is a table with the following columns: ID, Output Type, IP/Port, Region, and Edit. The table contains 8 rows of data, each representing an output channel. The IP/Port column shows a placeholder IP address followed by "/8000". The Region column shows a slash "/". Each row has an "Edit" icon (a pencil) in the rightmost column. At the bottom of the table, there is a pagination bar showing "Total 24 Page 1/3" and navigation buttons: a left arrow, a double left arrow, a double right arrow, a right arrow, and a page indicator "1 / 3" with a right arrow.

ID	Output Type	IP/Port	Region	Edit
1	BNC 01	192.168.1.1/8000	/	
2	BNC 02	192.168.1.2/8000	/	
3	BNC 03	192.168.1.3/8000	/	
4	BNC 04	192.168.1.4/8000	/	
5	BNC 05	192.168.1.5/8000	/	
6	BNC 06	192.168.1.6/8000	/	
7	BNC 07	192.168.1.7/8000	/	
8	BNC 08	192.168.1.8/8000	/	

**Figure 4-15 Output Channel**

## 4.6.3 Camera Group

Camera group enables you to preview a group of cameras (input channels) in sequence.

### Steps

1. Go to **Keyboard** → **Channel** → **Camera Group** .

Input Channel	Output Channel	Camera Group	+	🗑️	Enter keywords	🔍		
<input type="checkbox"/>	ID	CAM-G Name	Channels	Interval (s)	Edit	Link	Preview	Delete
<input type="checkbox"/>	1	1	5	10	✎	🔗	▶	🗑️
<input type="checkbox"/>	2	2	0	30	✎	🔗	▶	🗑️
<input type="checkbox"/>	3	123	0	30	✎	🔗	▶	🗑️

Figure 4-16 Camera Group

2. Tap + .

Add CAM-G

ID

Name

Interval (s)

Figure 4-17 Add Camera Group

3. Enter group name and interval.

**Interval:** The time to dwell in each input channel before switching to next channel.

4. Tap OK.

5. Add input channel to camera group.

- Select a channel and tap 🗑️ on the right.
- Check input channels and tap 🗑️ on the upper-right corner.

Link Channel							
Unlinked Channel		Linked Channel		🗑️	Enter keywords	🔍	
<input type="checkbox"/>	ID	Channel Name	Num	IP/Port	Stream	Protocol	Link
<input type="checkbox"/>	1	Camera 1	1	192.168.1.1/8000	Main Stream	TCP	🗑️
<input type="checkbox"/>	2	BNC 07	2	192.168.1.2/8000	Main Stream	TCP	🗑️
<input type="checkbox"/>	3	DECODER VGA 01	1	192.168.1.3/8000	Main Stream	TCP	🗑️
<input type="checkbox"/>	4	DECODER DVI 01	65	192.168.1.4/8000	Main Stream	TCP	🗑️
<input type="checkbox"/>	5	DECODER VGA 01	2	192.168.1.5/8000	Main Stream	TCP	🗑️
<input type="checkbox"/>	6	DECODER DVI 01	1	192.168.1.6/8000	Main Stream	TCP	🗑️
<input type="checkbox"/>	7	ipc_12_你好	33	192.168.1.7/8000	Main Stream	TCP	🗑️
<input type="checkbox"/>	8	IPdome	1	192.168.1.8/8000	Main Stream	TCP	🗑️

Total 8 Page 1/1 ⏪ ⏩ 1 /1 ⏴ ⏵

Figure 4-18 Link Channel

## Note

- Up to 16 camera groups can be added.
- Each camera group can link up to 64 input channels.
- Interval range: 10 to 65535 seconds.
- The camera groups set by different users are independent. Namely, users can only view and edit their own camera groups.

6. **Optional:** Tap **Linked Channel**, check input channels to be unlinked and tap  to unlink the input channel.

## 4.7 User Management

Administrator can add operator and allocate devices to operator. Operator permissions are as follows:

- Add, edit, and delete macro and group.
- Add, edit, and delete region.
- Deleting, editing, and adding devices are not allowed.

### Steps

1. Go to **Keyboard** → **System** → **User** .
2. Tap  .
3. Enter user name and password for an operator, and tap **OK**.

The screenshot shows a dialog box titled "Add User". It contains three text input fields labeled "Name\*", "New\*", and "Confirm\*". At the bottom of the dialog, there are two buttons: a blue "OK" button and a white "Cancel" button.

Figure 4-19 Add User

## Caution

We highly recommend you create a strong password of your own choosing (Using a minimum of 8 characters, including at least three of the following categories: upper case letters, lower case

letters, numbers, and special characters.) in order to increase the security of your product. And we recommend you reset your password regularly, especially in the high security system, resetting the password monthly or weekly can better protect your product.

---

#### 4. Allocate devices to operator.

- Tap  of device to be linked.
  - Check devices as desired and tap  on the upper-right corner.
- 

#### Note

- Keyboard supports up to 32 users: 1 administrator and 31 operators.
  - The operator can only operate on the devices allocated.
- 

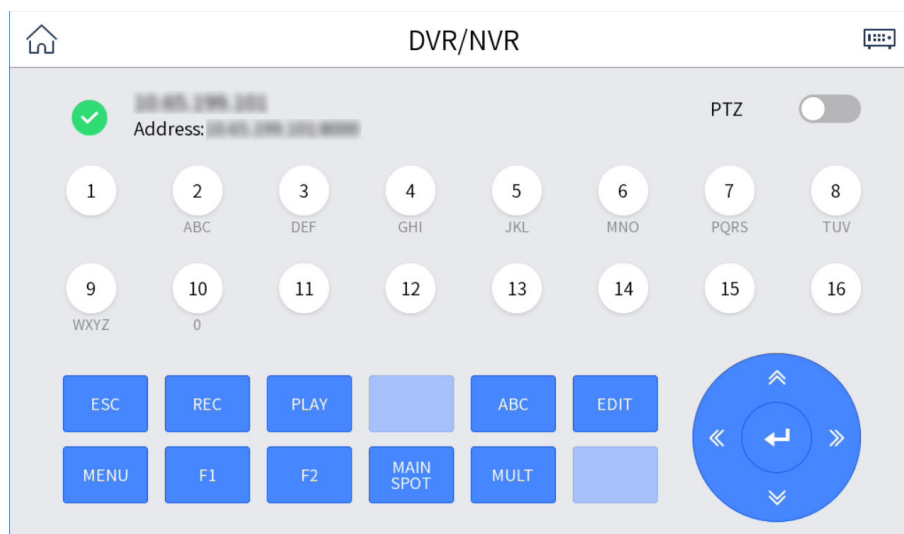

#### 5. **Optional:** Tap **Linked Device**, check the devices to be unlinked and tap to unlink the devices.

## 4.8 Video Recorder

Control video recorder by operating video record remote panel.

### 4.8.1 Remote Panel

Press **Num+DEVICE** to show video recorder remote panel. Num refers to video recorder ID. Go to **Device** for video recorder ID.

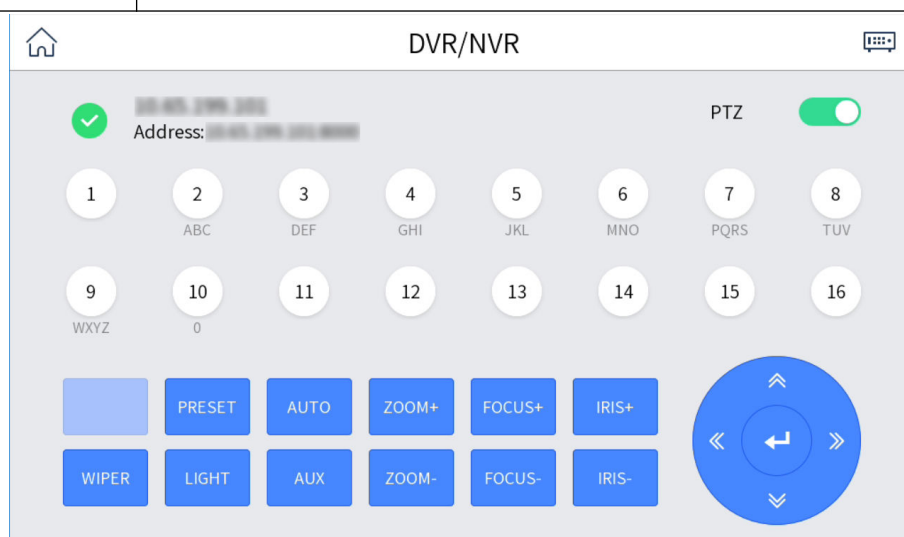

**Figure 4-20 Remote Panel (Disable PTZ)**

**Table 4-4 Button Description**

Button	Description
Disable PTZ	Exit PTZ control mode.
Numeric Key	<ul style="list-style-type: none"> <li>• In editing mode, tap it to enter number 1 to 16.</li> <li>• In live view or PTZ mode, tap it to switch channel.</li> <li>• During playback, tap it to switch channel.</li> </ul>
ESC	Exit the current menu.
REC	Start/stop manual recording.
PLAY	<ul style="list-style-type: none"> <li>• In live view mode, tap it to enter <b>Instant Playback</b> interface.</li> <li>• During playback, tap it to select a day in the calendar.</li> </ul>
ABC	In editing mode, tap it to switch input method among digits, letters, and characters.
EDIT	<ul style="list-style-type: none"> <li>• In editing mode, tap it to delete the content before the cursor.</li> <li>• Check/uncheck a checkbox.</li> <li>• In setting menu, tap it to enter editing mode.</li> </ul>
MENU	<ul style="list-style-type: none"> <li>• Enter main menu interface.</li> <li>• In second-level menu, tap it to go back to <b>Live View</b> interface.</li> <li>• During playback, tap it to hide the control bar.</li> </ul>
F1	<ul style="list-style-type: none"> <li>• During playback, tap it to switch between play and reverse play.</li> <li>• In live view mode, tap it to start instant playback.</li> </ul>
F2	<ul style="list-style-type: none"> <li>• Tap it to switch tab page.</li> <li>• During playback, tap it to switch playback mode between playback by channel and playback by file.</li> <li>• During simultaneous playback, tap it to switch channel.</li> </ul>
MAIN/SPOT	Tap it to switch the output between main port and auxiliary port.
MULT	In live view mode, tap it to switch image division.
Directional Button	<ul style="list-style-type: none"> <li>• Move the active selection in a menu. Tap it to move the selection up and down.</li> <li>• In live view mode, tap it to switch different channels.</li> <li>• In playback mode:               <ul style="list-style-type: none"> <li>• Up (corresponds to  in playback menu): Tap it to speed up.</li> <li>• Down (corresponds to  in playback menu): Tap it to slow down.</li> </ul> </li> </ul>

Button	Description
	<ul style="list-style-type: none"> <li>• Left (corresponds to ◀ in playback menu): Tap it to switch to previous file/event/tag/day.</li> <li>• Right (corresponds to ▶ in playback menu): Tap it to switch to next file/event/tag/day.</li> </ul>
Enter	<ul style="list-style-type: none"> <li>• Confirm an operation.</li> <li>• Check a checkbox and switch <b>ON/OFF</b>.</li> <li>• During playback, tap it to stop/resume playback.</li> <li>• In single frame playback mode, tap it to play next frame.</li> </ul>

**Figure 4-21 Remote Panel (Enable PTZ)**

**Table 4-5 Button Description**

Button	Description
Enable PTZ	In PTZ live view mode, enable PTZ to enter PTZ control mode.
Numeric Button	Switch to the corresponding channel.
PRESET	Tap <b>PRESET+Num</b> to call the preset.
AUTO	Enter auto-scan mode.
ZOOM+	Zoom in.
FOCUS+	Increase focus.
IRIS+	Increase iris.
WIPER	Turn on/off PTZ wiper.
LIGHT	Turn on/off PTZ light.
AUX	Reserved.

Button	Description
ZOOM-	Zoom out.
FOCUS-	Decrease focus.
IRIS-	Decrease iris.
Directional Button	Control PTZ movement.
Enter	In auto-scan mode, tap it to stop/resume auto-scan.

## 4.8.2 Live View

### Video Recorder (Version before 4.0)

Whatever interface the video recorder is in, tap **ESC** till you enter the live view mode.

### Video Recorder (Version: 4.0 and above)

Whatever interface the video recorder is in, tap **directional button** to enter the live view mode.

## 4.8.3 PTZ Control

You can control the added speed dome, like control PTZ movement, turn on/off light, turn on/off wiper, increase/decrease iris, increase/decrease focus, zoom in/out, call preset. But setting preset, setting and calling pattern, and setting and calling patrol are not supported.

### General Operation

Operate the joystick and buttons to control PTZ.

### Call a Preset

Tap **PRESET+Num** to call the preset.

## 4.8.4 Playback

### Video Recorder (Version before 4.0)

In live view mode, tap **PLAY**.

### Video Recorder (Version 4.0 and above)

- In live view mode, tap **PLAY**.
- In other menu, tap directional button to navigate to playback menu.

### 4.9 Connect the Device Through Serial Ports

The network keyboard can be connected to the device through RS-232 and RS-485 serial port. After the connection, the keyboard can be used to control the video recorder, analog dome and analog matrix.

#### 4.9.1 Connect Video Recorders

The keyboard can be connected to the video recorder through RS-485 serial port to realize preview, playback, PTZ control and other functions.

##### Steps

1. Connect the KB port of the video recorder with the RS-485 interface of the keyboard.

---

##### Note

T+ and T- of RS-485 interface correspond to D+ and D- of KB port respectively.

---

2. Enter **Serial Port Control**, and select **DVR/NVR**.
3. Select **Device Address**.
4. Select **Device Version**.

---

##### Note

- The device version is the firmware version of the corresponding device.
  - Please select according to the actual device version. Wrong version selection will cause some function exceptions.
- 

5. Control video recorder through remote panel of video recorder. For details, see **Remote Panel** .

---

##### Note

You can only control the video recorder through the joystick and touchscreen, and the shortcut of network keyboard cannot be used to control the video recorder.

---

**Figure 4-22 Connect Video Recorder (PTZ Disabled)**

**Figure 4-23 Connect Video Recorder (PTZ Enabled)**

## 4.9.2 Connect Analog Matrix

The keyboard can be connected to the analog matrix through RS-232 serial port.

### Steps

1. Connect the analog matrix to the RS-232 interface on the keyboard.
2. Enter **Serial Port Control**, select **Analog Dome/Analog Matrix**, and tap **OK**.
3. Tap  on the upper-right corner and select **RS232**.
4. Set the parameters of RS232 serial port.

The image shows a 'Serial Port Settings' dialog box. At the top, there are two tabs: 'RS485' and 'RS232', with 'RS232' being the active tab. Below the tabs, there are several configuration fields: 'Address' is set to '0'; 'Protocol' is set to 'ZT-2.0'; 'Baud Rate' is set to '9600'; 'Data Bit' is set to '8'; 'Parity Bit' is set to 'None'; and 'Stop Bit' is set to '1'. At the bottom of the dialog, there are two buttons: 'OK' and 'Cancel'.

**Figure 4-24 Setting Parameters of RS232 Serial Port**

**5. Optional:** Switch one input port of the analog matrix to the output port.

- 1) Part of the analog matrix needs to enter the device number in the keyboard.
- 2) Press **1+MON**.
- 3) Press **2+CAM** to switch the input port 2 to the output port 1.

### 4.9.3 Connect Analog Dome

The keyboard can be connected to the analog dome through RS-485 serial port to control PTZ control, set and call preset, call patrol and pattern, etc.

#### Steps

1. Connect the analog dome to RS-485 interface on the keyboard.
2. Tap **Serial Port Control**, select **Analog Dome/Analog Matrix** and tap **OK**.
3. Tap  on the upper-right corner and select **RS485**.
4. Set the parameters of RS485 serial port.

The image shows a 'Serial Port Settings' dialog box. At the top, there are two tabs: 'RS485' (which is selected and highlighted in blue) and 'RS232'. Below the tabs, there are several configuration fields, each with a dropdown arrow on the right:

- Address: 0
- Protocol: Private
- Baud Rate: 9600
- Data Bit: 8
- Parity Bit: None
- Stop Bit: 1

At the bottom of the dialog box, there are three buttons: 'Copy to All', 'OK' (highlighted in blue), and 'Cancel'.

**Figure 4-25 Setting Parameters of RS485 Serial Port**

5. Press **NUM+CAM** and select analog dome.

---

 **Note**

One RS-485 serial port can be connected to multiple analog domes. The longer the serial port cable is, the fewer analog dome can be connected at the same time.

---

6. Control PTZ through the joystick.

---

 **Note**

- Setting and calling preset, and calling patrol and pattern are supported. For details, see **PTZ Control**.
  - Calling and setting patrol are supported, and the specific number of analog domes supported varies with the protocol of the analog domes.
-

## Chapter 5 iSecure Mode

### 5.1 Login

#### Steps

1. Tap **iSecure** at home page.

**Figure 5-1 Log in to iSecure**

2. Tap **Server IP** on the upper right corner.

**Figure 5-2 Server IP Configuration**

3. Select **Http** or **Https** as the login mode.
4. Enter the IP address and port No. of the server, and tap **OK**.
5. Enter the user name and password of the server.
6. **Optional:** Check **Remember**.
7. Tap **Login**.

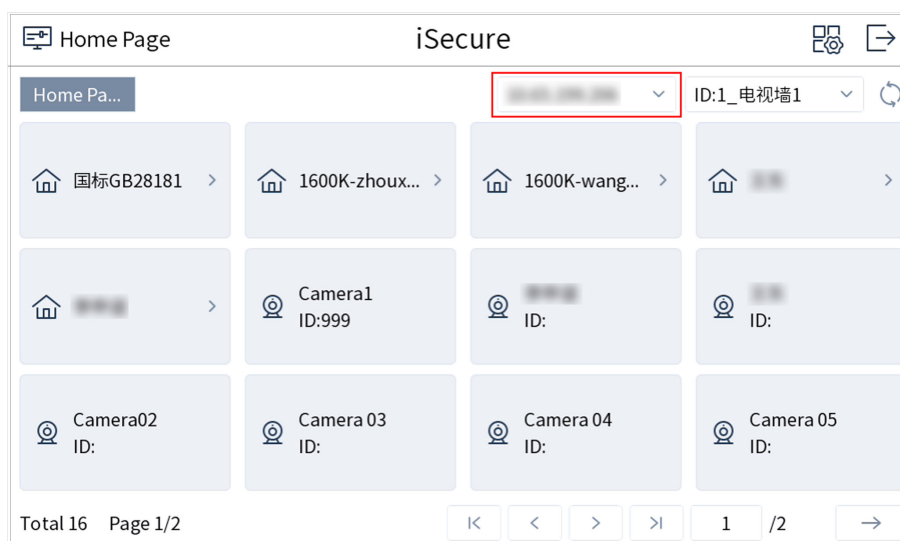

---

#### **Note**

- After several failed login attempts, you need to enter verification code. The details are subject to the actual interface.
  - When you attempt to log into the platform for the first time, you will be prompted to log into the client first.
  - If a platform is cascaded with other platforms, you can view all cameras and video walls of the platform and its cascading platforms when you log in to the platform through the keyboard.
-

## 5.2 Resource List

Resource list interface appears after you log in to iSecure. Resource list contains control center, region, video wall, and camera. Tap a control center or region, you can view its subordinate control center, region, and camera.

**Figure 5-3 Resource List (iSecure)**

- Tap the drop-down list on the upper right corner to view video wall ID and select a video wall. Tap the drop-down list in the red box to select other server.
- Tap to select a control center or region to view its subordinate camera ID.
- The camera ID can be only edited in the platform client. For details, please refer to the user manual of the platform.

## 5.3 Local Live View

You can preview the cameras on iSecure platform on the touchscreen.

### 5.3.1 Enable Local Live View

Preview the images of cameras by operating keyboard shortcut.

#### Steps

1. Press **0+MON** to enter local live view.
2. Preview Operations.
  - Press **Num+CAM** to perform the preview operation.
  - Select  on the upper-right corner on the touchscreen, and select a channel under the node to display.
3. During preview, switch channels, capture images or clip images.

<b>4-Window Preview</b>	<ul style="list-style-type: none"><li>• Press <b>4+MULT</b> to switch the current image into 4 windows, and tap any window to preview more cameras.</li><li>• Press <b>1+MULT</b> to return the previous image.</li></ul>
<b>Switch Channels</b>	Press <b>PREV/NEXT</b> to switch to the previous or next channel.
<b>Capture Images</b>	Press the top of the joystick to capture an image.
<b>Clip Videos</b>	Press ● to start clipping and press it again to stop clipping.

### 5.3.2 PTZ Operation

You can control the added speed dome, like control PTZ movement, turn on/off light, turn on/off wiper, zoom in/out, increase/decrease iris, increase/decrease focus, set and call preset, call patrol/pattern.

For detailed steps, see *PTZ Control* .

## 5.4 Video Wall Operation

### 5.4.1 Region Configuration

The whole video wall can be divided into different regions.

#### Steps

1. Tap  on the upper-right corner.
2. Tap  .

**Figure 5-4 Add Region**

3. Enter video wall ID, start and end coordinates.

4. Tap **OK**.

---

 **Note**

- Up to 16 regions are supported.
  - The maximum region specification is 6 × 8.
  - After the region is configured, when pressing **Num+REGION**, it will firstly select the region.
  - If you do not configure the region, region 1 corresponds to video wall 1, region 2 corresponds to video wall 2, region 16 corresponds to video wall 16 by default.
- 

### 5.4.2 Video Wall Control

- Select a coordinate grid that has been linked with an output interface, and perform operations such as opening a window, closing a window, resizing a window, and dividing a window.
- Select a video wall to switch scenes and display the current layout.
- Switch the designated camera to the designated monitor or sub-window of the video wall.
- Do not support camera group.

For detailed steps, see **Video Wall Control** .

### 5.4.3 PTZ Operation

You can control the added speed dome, like control PTZ movement, turn on/off light, turn on/off wiper, zoom in/out, increase/decrease iris, increase/decrease focus, set and call preset, call patrol/pattern.

For detailed steps, see *PTZ Control* .

### 5.5 Video Wall Playback

On the keyboard video wall, you can play back video files from cameras on iSecure platform.

---

#### Note

- Some operations in the process of playback are not supported. Please follow the interface prompt messages.
  - The progress bar will be displayed during playback. You can drag the progress bar back and forth to view the playback image.
- 

#### Method 1

1. Press **Num+REGION** to select a region, or press **Num+WALL** to select a wall.
2. Tap to select a window to start playback. For detailed steps, see *Video Wall Playback* .

#### Method 2

1. Select a wall in the wall list.
2. Press **Num+MON**.
3. Select a channel with records to start playback.

## Chapter 6 HikCentral Mode

The keyboard is accessible to HikCentral platform, and the images of the cameras accessible to HikCentral platform can be displayed on the video wall and previewed locally.

### 6.1 Login

#### Steps

1. Tap **HikCentral** at home page.

Figure 6-1 HikCentral Login

2. Tap **Server IP** on the upper right corner.

Figure 6-2 Configure Server IP (HikCentral)

3. Select **Http** or **Https** as the login mode.
4. Enter server IP address and port, and tap **OK**.
5. Enter server user name and password.
6. **Optional:** check **Remember**.
7. Tap **Login**.

---

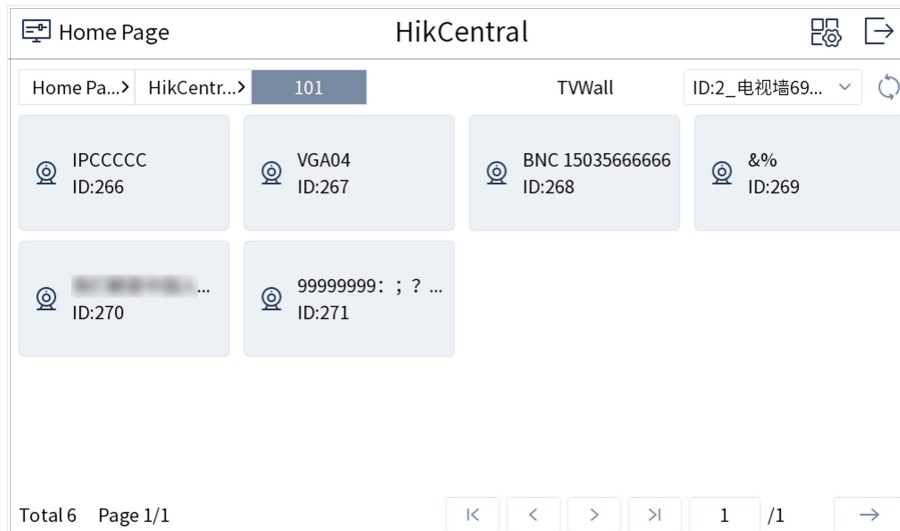

#### Note

After several failed login attempts, you need to enter verification code. The login attempt times are decided by platform.

---

## 6.2 Resource List

Resource list interface appears after you log into HikCentral platform. Resource list contains control center, region, video wall, and camera. Tap a control center or region, and you can view its subordinate control center, region, and camera.

**Figure 6-3 Resource List (HikCentral)**

- Tap the dropdown list on the upper right corner to view video wall ID and select a video wall.
- Tap  on the upper right corner to divide the whole video wall into regions.
- Select a site, and tap to select a control center or region to view its subordinate camera ID.
- The camera ID can be only edited in the platform client.

## 6.3 Local Live View

You can preview the cameras on HikCentral platform on the touchscreen.

### 6.3.1 Enable Local Live View

Preview the images of cameras by operating keyboard shortcut.

#### Steps

1. Press **0+MON** to enter local live view.
2. Preview Operations.
  - Press **NUM+CAM** to perform the preview operation.
  - Select  on the upper-right corner on the touchscreen, and select a channel under the node to preview.

**Figure 6-4 Local Live View**

3. During preview, use the joystick to control the pattern of PTZ.
4. During preview, switch channels, capture images or clip videos.

**4-Window  
Preview**

- Press **4+MULT** to switch the current image into 4 windows, and tap any window to preview more cameras.
- Press **1+MULT** to return the previous image.

**Switch Channels**

Press **PREV/NEXT** to switch to the previous or next channel.

**Capture Images**

Press the top of the joystick to capture an image.

**Clip Videos**

Press ● to start clipping and press it again to stop clipping.

---

**Note**

In HikCentral interface, press **Num+CAM** to control PTZ without previewing the images from speed domes.

---

## 6.3.2 PTZ Operation

You can control the added speed dome, like control PTZ movement, turn on/off light, turn on/off wiper, zoom in/out, increase/decrease iris, increase/decrease focus, set and call preset, call patrol/pattern.

For detailed steps, see **PTZ Control**.

## 6.4 Video Wall Operation

### 6.4.1 Region Configuration

The whole video wall can be divided into different regions for management.

#### Steps

1. Tap  on the upper-right corner.
2. Tap .

The screenshot shows a dialog box titled "Add Region". It contains the following fields and buttons:

- Video Wall\* (input field)
- Start Row\* (input field)
- Start Column\* (input field)
- End Row\* (input field)
- End Column\* (input field)
- OK button (blue)
- Cancel button (white)

Figure 6-5 Add Region

3. Enter video wall ID, start and end coordinates.
4. Tap **OK**.

---

#### Note

- Up to 16 regions are supported.
  - The maximum region specification is 6 × 8.
  - If you do not configure the region, region 1 corresponds to video wall 1, region 2 corresponds to video wall 2, and region 16 corresponds to video wall 16 by default.
-

### 6.4.2 Video Wall Control

- When you press **Num+CAM** to preview, the stream type adapts to the platform by default. But you can switch the stream type.
- Select a coordinate grid that has been linked with an output interface, and perform operations such as opening a window, closing a window, resizing a window, and dividing a window.
- Select a video wall to switch scenes and display the current layout.
- Switch the specified camera to the specified monitor or sub-window of the video wall.
- Do not support camera group.

For detailed steps, see **Video Wall Control** .

### 6.4.3 PTZ Operation

You can control the added speed dome, like control PTZ movement, turn on/off light, turn on/off wiper, zoom in/out, increase/decrease iris, increase/decrease focus, set and call preset, call patrol/pattern.

For detailed steps, see **PTZ Control** .

## 6.5 Video Wall Playback

On the keyboard video wall, you can play back video files from cameras on HikCentral platform.

#### Note

Fast playback, slow playback, and pause/resume playback are supported. The progress bar will be displayed during playback. You can drag the progress bar back and forth to view the playback screen.

---

#### Method 1

1. Press **Num+REGION** to select a region, or press **Num+WALL** to select a wall.
2. Tap to select a window to start playback. For detailed steps, see **Video Wall Playback** .

#### Method 2

1. Select a wall in the wall list.
2. Press **Num+MON**.
3. Select a channel with records to start playback.

## Chapter 7 System

Tap **System** at home page to enter system interface. You can configure keyboard network, hardware, time, etc.

### Note

Restoring default settings, importing/exporting configuration files, and remote upgrades require the administrator password to be verified.

### 7.1 Language

Select **System** → **Maintenance** → **Language** to view the language.

### 7.2 Hardware

Go to **System** → **Hardware** , and set the following parameters.

Auto Sleep	Never
Transparency	1:1
Performance	Medium(Default)
External Display	Sync Display Async Display
Resolution	1080P60Hz(1920*1080)
Brightness	<input type="range"/>
Alarm	<input type="checkbox"/>

Save

Figure 7-1 Hardware Parameters

#### Transparency

Select menu transparency. Available only in local live view.

#### Performance

You can select minimum delay, medium(default) or default according to the actual network.

#### External Display

When **Sync Display** is selected, the connected monitor displays the same image as the keyboard. When **Async Display** is selected, the connected monitor displays the local live view image.

## Alarm

Keyboard alarms when network disconnected or IP conflicted.

## 7.3 Storage

### 7.3.1 FTP Storage

Captured images and clipped videos will be saved to FTP server. And when you upgrade keyboard via FTP server, the upgrade file from FTP server will be uploaded to the keyboard.

#### Before You Start

Build a FTP server.

#### Steps

1. Go to **System** → **Storage** → **FTP** .

The screenshot shows a configuration window for FTP storage. At the top, there are two tabs: 'FTP' (selected) and 'USB'. Below the tabs are five input fields: 'IP Address' (with a blurred value), 'Folder' (empty), 'User Name' (with a blurred value), and 'Password' (with three asterisks). A blue 'Save' button is located at the bottom right of the form.

Figure 7-2 FTP Storage

2. Configure FTP server information.
  - **IP Address:** IP address of FTP server.
  - **Folder:** The folder name to be created in FTP server.
  - **User Name** and **Password:** User name and password of FTP server.

---

#### Note

The following special characters are not allowed: / \ : \* ? ' " < > | %.

---

3. Tap **Save**.

## 7.3.2 USB Storage

Save captured images and clipped videos in USB flash drive.

### Steps

1. Go to **System → Storage → USB** .
2. Tap **Save**.

## 7.4 Upgrade

You are recommended to upgrade your keyboard under the help of professional technical support. Export configuration file of the keyboard before upgrade.

For detailed steps, see *Import/Export Configuration File* .

### 7.4.1 FTP Upgrade

#### Steps

1. Configure FTP server. For detailed steps, see *Storage* .
2. Turn on FTP server and input upgrade file into FTP root folder.
3. Go to **System → Maintenance** and select FTP upgrade.
4. Enter admin password to confirm.

### 7.4.2 USB Flash Drive Upgrade

#### Steps

1. Save upgrade file in USB flash drive.
2. Connect USB flash drive to keyboard USB interface.
3. Go to **System → Maintenance** and select USB Flash Drive upgrade.
4. Enter admin password to confirm.

## 7.5 Import/Export Configuration File

You can export the configuration file to the computer or import the configuration file from the computer to the keyboard. In case of keyboard failure, you need to back up the data by exporting the configuration file first, and then repair the failure. When you need to copy the data of this keyboard to another keyboard, you can also import/export the configuration file.

### Steps

1. Go to **System → Maintenance** .
2. Import/export configuration file.
  - Import Configuration File:

- a. Tap **Import**.
  - b. Enter admin password.
  - c. Select the database file (DataConfiguration) to import.
- Export Configuration File:
    - a. Tap **Export**.
    - b. Enter admin password.
    - c. Select the folder to export configuration file (kbConfig).

### 7.6 Factory Default

Restore keyboard to factory default settings.

Go to **System → Maintenance** .

- **Simple**: Restore all parameters, except the network (including IP address, subnet mask, gateway, MTU, NIC working mode, default route, server port, etc.) and user account parameters, to the factory default settings.
- **Complete**: Restore all settings to factory default settings.

### 7.7 Auxiliary Key

You can set F1 or F2 as **Two-way Audio** or **Enlarge/Restore Sub-Window**.

### 7.8 Lock Keyboard

#### Steps

1. Hold **LOCK** for 3 seconds to exit to home page and lock keyboard.
2. Press **LOCK** again to unlock keyboard.

## Chapter 8 Web Configuration

You can add devices, manage channels or configure basic parameters through the web interface of the network keyboard. It is convenient to remotely configure and maintain the network keyboard.

### 8.1 Login

#### Before You Start

Ensure that the network keyboard is connected to the network and the IP address of the network keyboard is obtained.

#### Steps

1. Open the browser, enter the IP address of the network keyboard (HTTPS://IP address) in the address bar, and enter the login interface.

Figure 8-1 Login

2. Enter user name and password.
3. Click **Login**.

### 8.2 Add Devices

#### 8.2.1 Manually Add

When the network keyboard is used as the control center and you select the keyboard operation mode, add the device first according to this section.

#### Steps

1. In **Device Management** interface, select to add **Center Device** or **IPC/Network Dome**.
2. Click **Add**, select to add devices by IP address or IP segment, and enter **IP Address, Port, User Name** and **Password**, and select protocol type.

The screenshot shows a dialog box titled "Add Device" with a close button (X) in the top right corner. The "Adding Mode" section has two radio buttons: "IP" (which is selected) and "IP Segment". Below this are several input fields: "Device Name", "IP Address", "Port", "User Name", "Password", and "Verification Code". A "Protocol" dropdown menu is set to "Default". At the bottom right, there are "OK" and "Cancel" buttons.

Figure 8-2 Add Device by IP Address

The screenshot shows a dialog box titled "Add Device" with a close button (X) in the top right corner. The "Adding Mode" section has two radio buttons: "IP" and "IP Segment" (which is selected). Below this are several input fields: "Start IP", "End IP", "Port", "User Name", "Password", and "Protocol" (set to "Default"). At the bottom right, there are "OK" and "Cancel" buttons.

Figure 8-3 Add Device by IP Segment

---

 **Note**

- It takes a long time to add devices by IP segment. Please wait patiently.
- After adding devices in IP segment mode, you need to refresh manually to get the added devices.

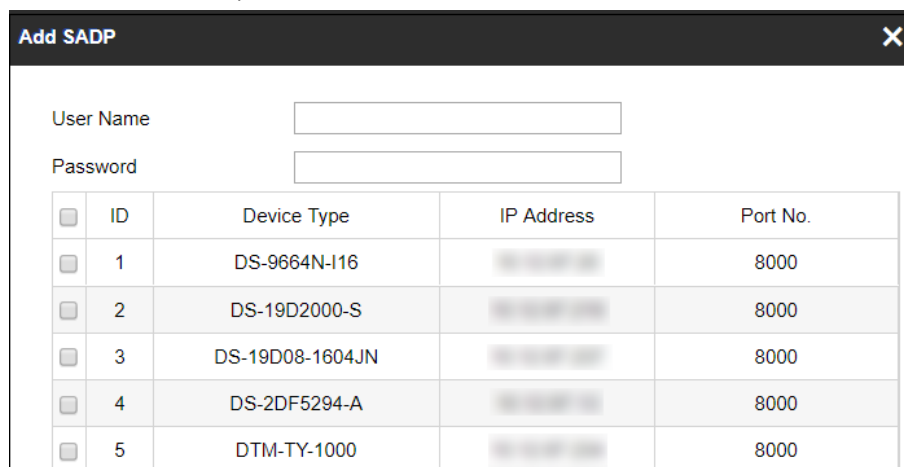

- 
3. If you enable stream encryption for the device, you need to enter the verification code when adding the device by IP address.

4. Check or uncheck **Add Video Recorder Output** as desired.

 **Note**

Check **Add Video Recorder Output**, and the output port type, channel number and other information will be listed in the output port list.

5. **Optional:** In **Device Management** interface, click **Add SADP**, enter user name and password, check the device to be added, and click **OK** to add online devices on the same network segment.

**Figure 8-4 Add SADP**

 **Note**

- SADP search can only add devices in the same network segment.
- After adding devices in batches by SADP, you need to refresh manually to get the added devices.

## 8.2.2 Import Input Channels in Batches

### Before You Start

1. Add several devices manually. Go to **Channel Management** → **Input Channel** , click **Export**, enter password, and then export channel information.
2. Edit the device channel information based on the exported template, and save the exported channel information into the local PC.

### Steps

1. Go to **Channel Management** → **Input Channel** .
2. Click **Import**.

Figure 8-5 Import Input Channel in Batches

3. Click **Browse** and select the imported template.
4. Enter password and click **OK**.

The channels in the template will be added into network keyboards.

## 8.3 Channel Management

### 8.3.1 Edit Channel

#### Steps

1. Go to **Channel Management** → **Input Channel**.

#### Note

Input and output channels can be edited. This section takes input channels as an example.

2. Select the input channel to be edited and click **Edit**.

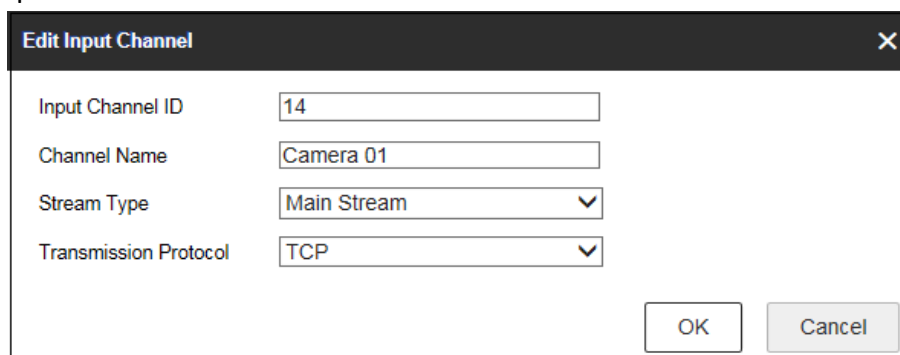

Figure 8-6 Edit Input Channel

3. Edit channel parameters.

#### Input Channel ID

Each input channel corresponds to a unique number, which is valid for video wall and local live view.

#### Stream Type

Code stream for local live view and video wall preview.

**Transmission Protocol**

Available for video wall preview.

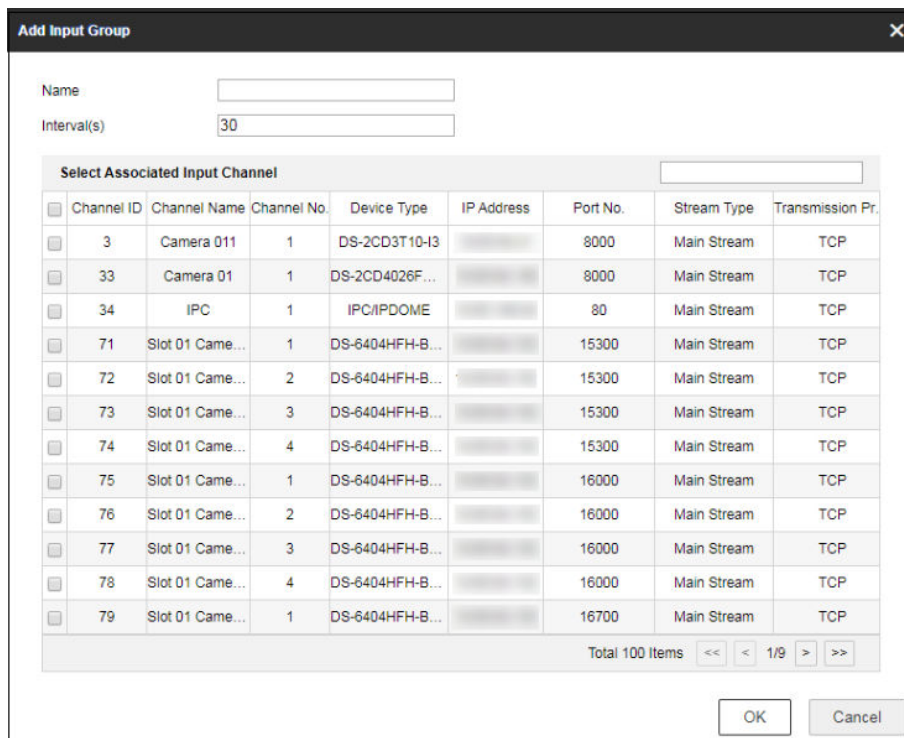

4. Click **OK**.

**8.3.2 Camera Group**

Camera group enables you to preview a group of cameras (input channels) in sequence.

**Steps**

1. Go to **Channel Management → Camera Group**.
2. Click **Add**.

**Figure 8-7 Add Camera Group**

3. Enter **Name** and **Interval(s)**.
4. Check input channels to be linked and click **OK**.

**Note**

- Up to 16 camera groups can be added.
- Each camera group can link up to 64 input channels.
- Interval range: 10 to 65535 seconds.
- The camera groups set by different users are independent. Namely, users can only view and edit their own camera groups.

5. Click **Edit** in **Camera Group** interface, uncheck input channels to be unlinked and click **OK** to unlink the input channel.

## 8.4 Serial Port Settings

RS-485 and RS-232 serial port parameters can be set in the **Serial Port Settings** interface. You can set baud rate, data bit, protocol type, stop bit, parity and other parameters of RS232 and RS485, edit the address of RS485 serial port, and copy RS485 serial port settings to all.

- Configure the parameters of RS-485 port when the serial port is connected to analog dome.
- Configure the parameters of RS-232 port when the serial port is connected to the analog matrix.

RS485		RS232
Address Bit	0	
Baud Rate	9600	
Data Bit	8	
Stop Bit	1	
Parity	None	
Protocol	Private	

**Figure 8-8 RS485 Serial Port Settings**

RS485	RS232	
	Baud Rate	9600
	Data Bit	8
	Stop Bit	1
	Parity	None
	Protocol	ZT-2.0

**Figure 8-9 RS232 Serial Port Settings**

## 8.5 Network

### Steps

1. Select **Network Management** at the main interface.
2. Configure network parameters.

- Check **DHCP** to obtain IP address and related network parameters automatically.
- Uncheck **DHCP** and enter IP address, gateway, subnet mask.

3. Click **Save**.

The screenshot shows a web interface titled "IP Address Settings". It contains a "DHCP" checkbox which is checked and labeled "Enable". Below this are five input fields: "IP Address", "Gateway", "Subnet Mask", and "Mac Address". At the bottom of the form is a red "Save" button with a floppy disk icon.

**Figure 8-10 Network Parameters**

## 8.6 System Settings

### 8.6.1 Version

Go to **System Management** → **Version** to view system version information, including device type, serial No., firmware version, decoding version, MCU version and web version.

The screenshot shows a web interface with two tabs: "Version" (selected) and "About". Below the tabs is a table of system information:

Device Model	DS-1105KI
Serial No.	D46450156
Firmware Version	
Decoding Version	
MCU Version	
Web Version	

**Figure 8-11 Version Information**

### 8.6.2 User Management

Administrator can add operator and allocate devices to operator. Operator permissions are as follows:

- Add, edit, and delete macro and group.
- Add, edit, and delete region.
- Deleting, editing, and adding devices are not allowed.

## Steps

1. Go to **System Management** → **User Management** .
2. Click **Add**.

**Add User**

User Name

Admin Password

Password

8 to 16 characters allowed, including at least 2 of the following types:  
upper-case letters, lower-case letters and digits.

Confirm Password

Select Associated Device

<input type="checkbox"/>	ID	Device Type	IP Address	Port No.
<input type="checkbox"/>		IPC/DS-2CD4232F...	192.168.1.100	8000
<input type="checkbox"/>		IPC/DS-2CD4824F...	192.168.1.100	8000
<input type="checkbox"/>		IPC/DS-2CD3T25-I3	192.168.1.100	8000
<input type="checkbox"/>		IPC/DS-2CD883F-E	192.168.1.100	8000

Selected 0 Total 4 Items << < 1/1 > >>

**Figure 8-12 Add User**

3. Enter user name and password for an operator, and click **OK**.

### Caution

We highly recommend you create a strong password of your own choosing (Using a minimum of 8 characters, including at least three of the following categories: upper case letters, lower case letters, numbers, and special characters.) in order to increase the security of your product. And we recommend you reset your password regularly, especially in the high security system, resetting the password monthly or weekly can better protect your product.

---

4. Check devices to be linked as desired and click **OK**.
- 

### Note

- Keyboard supports up to 32 users: 1 administrator and 31 operators.
  - The operator can only operate on the devices allocated.
- 

5. **Optional:** Click **Edit**, uncheck the devices to be unlinked and click **OK** to unlink the devices.

### 8.6.3 System Maintenance

Go to **System Management** → **System Maintenance** to restart the device, restore defaults, export/import configuration file, etc.

---

### Note

Restoring default settings, importing/exporting configuration files, and remote upgrades require the administrator password to be verified.

---

#### Restart

You can restart the network keyboard.

#### Restore Defaults

- **Simply Restore:** Keep the activation state (administrator password) and the network parameters of the network keyboard, and the remaining parameters will be restored to the default settings.
- **Completely Restore:** Completely restore the parameters to default settings.

#### Import/Export Configuration File

You can export the configuration file to the computer or import the configuration file from the computer to the keyboard. In case of keyboard failure, you need to back up the data by exporting the configuration file first, and then repair the failure. To copy the data of this keyboard to another keyboard, you can also import/export the configuration file.

 **Note**

- Please set the key for the configuration file when exporting it.
  - The configuration file encrypted and exported is named as configurationdata.
  - If the configuration file is encrypted, you need to enter the key of the configuration file when importing it.
- 

## Remote Upgrade

Click **Browse** to select the upgrade file in the computer, and click **Upgrade** to upgrade the network keyboard remotely.

---

 **Note**

The upgrade file must be named as digicap.dav.

---

## 8.6.4 Log Management

Go to **System Management** → **System Maintenance** → **Log** , select the major and minor types and start and end time of the log, and then search and export the log.

SN	Time	Major Type	Minor Type	Local/Remote User	Remote Host IP	Description
1	2019-11-07 09:44:29	Operation	Power On			
2	2019-11-07 10:21:18	Operation	Local: Login	admin		Keyboard
3	2019-11-07 10:21:26	Operation	Local: Delete the device	admin		Del DEV[10.65...

Total 42 Items << < 1/1 > >>

**Figure 8-13 View Logs**

## 8.6.5 Security Settings

Go to **System Management** → **Security Settings** , and enable or disable SSH and SADP.

---

- SSH is disabled by default after the network keyboard is restarted.
- When you enable SADP, the keyboard can be searched. When you disable SADP, the keyboard cannot be searched.

See Far, Go Further
