Specifications .................................................. 38
Features

27x, 33x, 37x Optical Zoom
The built-in 27x, 33x and 37x optical zoom lens are a highly durable component. It features auto focus, iris, and zoom functions.

Miscellaneous Functions
HLC (High Light Compensation), SENS-UP, FLP (H/V-REV), D-Zoom, Sharpness, Motion Detection and Privacy functions are provided.

SSNR 3
(Super Noise Reduction)
The high-performance W-5 DSP chip effectively removes low-light gain noise and ghosting to provide clear images even in dark environments.

DIS (Digital Image Stabilizer)
The DIS function compensates for any camera movement, to produce more stable pictures.

Fine Picture Quality under Ultra Low Lighting
1/4” high density CCD allows the user to capture bright, high-quality images under ultra low lighting conditions.

High Resolution
Featuring 600TV lines horizontal resolution in color mode and 700TV lines horizontal resolution in BW mode, the camera features Sony’s 410,000 pixel CCD and captures clean, noiseless, high-quality images.

SSDR
(Super Dynamic Range)
For images with high contrast between bright and dark areas from difficult lighting conditions such as backlighting, this camera selectively illuminates darker areas while retaining the same light level for brighter areas to even out the overall brightness. (it is an optional function for WDR product)

Day & Night (ICR)
This camera has a function that automatically selects the mode that is appropriate for daytime or night-time conditions. The COLOR mode operates in daytime conditions to provide optimum colors, and BW mode operates in night-time conditions to enhance the definition of the image.

Communication
RS-485, Coaxial communication methods are supported.
- RS-485 Protocols : Samsung-T, Samsung-E, Pelco-P, Pelco-D, Vicon, Panasonic, Bosch, Honeywell, AD
- Coaxial Communications: Pelco Coaxitron

OSD
The camera’s OSD is complimented by 18 foreign languages.
- NTSC : Korean, English, French, Spanish, Japanese, Portuguese, Taiwanese
- PAL : English, Italian, Chinese, Spanish, German, Russian, French, Polish, Portuguese, Turkish, Czech, Romanian, Serbian, Swedish, Danish
We care for the environment at all product manufacturing stages to preserve the environment and are taking a number of steps to provide customers with more environment-friendly products. The eco mark represents our will to create environment-friendly products and indicates that the product satisfies the EU RoHS Directive.

### Warning & Cautions

This information is provided to ensure your safety and to prevent any losses, financial or otherwise. Please read it carefully and use the product accordingly.

- For product inquiries, please contact the retail shop where you bought the camera. The use of equipment such as an aerial ladder while providing after-sales service shall be at your expense.
- Separate the power plug during a thunder storm.
- This product is only part of a surveillance system. Therefore, we can’t compensate for material loss and/or personal injuries by robbery, fire, natural disaster or some thing like this type.

### Warning/Attention/Special Mark Messages

### Correct Disposal of This Product

(Applicable in the European Union and other European countries with separate collection systems)

This marking shown on the product or its literature, indicates that it should not be disposed with other household wastes at the end of its working life. To prevent possible harm to the environment or human health from uncontrolled waste disposal, please separate this from other types of wastes and recycle it responsibly to promote the sustainable reuse of material resources.

Household users should contact either the retailer where they purchased this product, or their local government office, for details of where and how they can take this item for environmentally safe recycling.

Business users should contact their supplier and check the terms and conditions of the purchase contract. This product should not be mixed with other commercial wastes for disposal.
Do not install under extreme temperature conditions.

Do not install under unstable lighting conditions.

Do not drop the camera or subject it to physical shock.

Use only under temperature conditions between -10 ℃ and +50 ℃. Provide good ventilation when using in high temperature conditions.

Severe lighting changes or flickering may hinder normal camera operation.

May cause a product malfunction.

May lower image quality.

The lens is the most important component of the camera. Be careful not to smear it with fingerprints.

May damage the CCD.

Avoid touching the camera lens.

Never keep the camera face to strong light directly.

Provide good ventilation when using in high temperature conditions.

Severe lighting changes or flickering may hinder normal camera operation.
Do not install under extreme temperature conditions. Do not install in high humidity environment.

May cause a product malfunction. Wipe dry any liquid. Liquids may contain minerals that are corrosive to electronic components. Radioactivity expose may damage the CCD.

Notes

- Exposure to a spotlight or an object emitting strong light may cause smear or blooming.
- Ensure that the power source complies with normal specifications before supplying it to the camera

Components and Accessories

1. 27x (33x or 37x) Zoom Color Camera
2. Instruction Manual
3. 8-PIN Cable ASSY
4. Jumper cable for CDS Terminal
5. CDS Sensor
6. Foot
7. Screws for foot
① Tripod Mounting Bracket Screw Hole
Used to fix tripod mounting bracket on top of the camera.

② Tripod Mounting Hole
Used to install the camera on an optional tripod. The tripod must be equipped with screws with specifications shown on the right.

Attach the bracket to the top of the camera. Use screws included in the package or their equivalent (less than 6mm). Otherwise, the bracket may not to the camera properly.
③ Key Buttons
Following buttons control zoom, focus and auto focus functions.
WIDE button : To widen the view. (Zoom Out)
TELE button : To close in on a far object. (Zoom In)
F–NEAR button : To see a near object clearly.
F–FAR button : To see a far object clearly.

Pressing the 'SET' button locks the zoom control function of these buttons and prompts the main setup menu.
Main setup menu can be navigated using these buttons.

SET : To access the main setup menu.
UP (TELE button) : To move the arrow indicator to up.
DOWN (WIDE button) : To move the arrow indicator to down.
LEFT (F–NEAR button) : To move the arrow indicator to left.
RIGHT (F–FAR button) : To move the arrow indicator to right.

④ Power Input Terminal
Power supply terminal
DC Type : DC12V ± 10% Dual Type: DC12V ± 10% / AC24V ± 10%

⑤ Power LED
Illuminates when power is supplied.

⑥ Video Output Jack
Used to connect an external video monitor in jack.

⑦ RJ–45 Jack
Terminals, such as RS–485 communications, MID OUT, ZOOM, and FOCUS, EX_DN are included.

⑧ CDS Sensor Jack
Terminals for CDS sensor at the EX_DN condition.
Connecting to Monitor

Connect video out jack to the monitor’s video in jack as shown below.

- Connection methods may vary depending on the video equipment. Please refer to the model specific instruction manual.
- Connect cables with the unit powered down.
### Connection

#### Connecting to Power

- **Power Input Terminal**

  DC12V, 500mA / Dual: DC12V/AC24V, 500mA (Option)

#### Notes

- Connect the power once the installation is complete.
- The wire is polarized. Match ‘+’ and ‘-’ terminals properly.

#### Connecting to 8P Control Terminal

The camera can be controlled by using external controllers like a remote controller. (RS-485 Communication)

#### 8P Control Terminal Configuration

MD (Motion Detection) Output format is open collector.
- When using the MD function, the ‘GND’ should be connected to the frame ground.
- Do not simultaneously connect the RS-485 (+) (-) communication line when you use voltage control ZOOM and FOCUS, using the RECEIVER BOX.

- Match the communication setup between devices when you use the wired controller (SPC-200A) or SCC-3100A.

Menu Setup

Use the five buttons on back of the camera.

1. Press the SET button for 2 seconds. (Short-pressing the button activates the AUTO FOCUS)
   - Main Setup menu is displayed on the monitor screen.

2. Select the desired feature using the UP or DOWN button.
   - Each pressing of the UP or DOWN button moves the indicator to the next or previous feature.
   - Move the arrow indicator to the desired feature item.
3. Change the status of the selected feature using the LEFT or RIGHT button.
4. When completed, move the arrow indicator to ‘EXIT’ and press the SET button.

Notes

- Features marked with a ▶ have an accessible submenu.
- Access the submenu by pressing the SET button.
SSDR (Super Dynamic Range)

SSDR illuminates darker spots of an image while retaining the same level for brighter sports to even out the overall brightness of images with contrast between bright and dark sports.

1. When the SETUP menu screen is displayed, select ‘SSDR’ by using the button so that the arrow indicates ‘SSDR’.
2. Use the button to change the SSDR level according to the contrast between bright and dark areas.

White Bal (White Balance)

Use the White Balance function to adjust the screen color.
1. When the SETUP menu screen is displayed. Select ‘white Bal’ by using the UP and DOWN buttons so that the arrow indicates ‘White Bal’.
2. Select a desired mode using the UP and DOWN buttons.
Select one of the following 5 modes, as appropriate for your purpose.

- **ATW**: Select this when the color temperature is between 1,800°K and 10,500°K.
- **MANUAL**: Select this to fine-tune White Balance manually. Set White Balance first by using the ATW or AWC mode. After that switch to MANUAL mode, fine tune the White Balance and then press the function setup switch.
- **AWC → SET**: To find the optimal luminance level for the current environment, point the camera towards a sheet of white paper and press the function setup switch, if the environment changes, readjust it.
- **OUTDOOR**: Select this when the color temperature is between 1,700°K and 11,000°K. (sodium light inclusion)
- **INDOOR**: Select this when the color temperature is between 4,500°K and 8,500°K.

**Notes**

- White Balance may not work properly under the following conditions. In this case select the AWC mode.
  1. When the color temperature of the environment surrounding the subject is out of the control range (e.g. clear sky or sunset).
  2. When the ambient illumination of the subject is dim.
  3. If the camera is directed towards a fluorescent light or is installed in a place where illumination changes dramatically, the white balance operation may become unstable.

**BACKLIGHT**

Unlike conventional cameras, this camera is designed to deliver a distinctive subject and background at the same time, even when the subject is backlight, by using the features of the proprietary W5 DSP chip.

1. When the SETUP menu screen is displayed, select ‘BACKLIGHT’ by using the UP and DOWN buttons so that the arrow indicates ‘BACKLIGHT’.
1. Select a desired mode using the LEFT and RIGHT button depending on the camera purpose.
   ● OFF : Not being used
   ● BLC : Enables a user to directly select a desired area from a picture and to view the area more clearly.
   ● HLC (High Light Compensation) :
     If the scene contains extremely bright light areas such as; from car headlight, the light can mask out much of the on-screen detail.
     - LEVEL : Adjust level of the HLC function (LOW, MIDDLE, HIGH).
     - MASK TONE : Change the brightness
     - LIMIT : Enable to change the operating condition.

2. Select a desired mode using the LEFT and RIGHT button and press the SET button.
   ● Select ‘BLC’ to adjust the area to be enhanced then adjust the level.

Notes

● Since the following symptoms may occur according to the ambient illumination when BLC is selected, set it to OFF.
   ① Color or screen changes unnaturally.
   ② Noise appears in the bright part of the screen.
   ● Since the performance of the BLC function may be affected by the area of the bright part of the screen, optimize the installation angle for the best BLC performance.
   ● If you increase LIMIT, the screen display may be distorted.
   ● For high performance of BLC function, we recommend that you set IRIS to AUTO in the EXPOSURE setup.
   ● Activating BLC may cause the camera to repeat the auto focus operation depending on lighting conditions. It is recommended that you use the focus setup menu in ONE-PUSH or MANUAL mode.
   ● Smart Zoom and BLC cannot be used in conjunction with each other.
   ● Setting up Smart Zoom and then BLC automatically cancels Smart Zoom.
- HLC: Enable the user to change the level, mask tone area.

For effective viewing of license plates, there is a minimum required illumination and the shutter speed needs to be faster than 1/200sec.
- Because there can be a difference in the effectiveness of HLC according to the amount of light area in the screen, optimize the installation angle for the best HLC performance.
- When dark, the HLC is only activated when a bright light exceeding a specific size. (In NIGHT ONLY mode)
- The HLC is not activated in day light or when bright light is not present at night (In NIGHT ONLY mode)
- The HLC is not activated when the D-ZOOM mode is ‘ON’ or ‘DIS’ mode is ‘ON’.

Motion Detection

This product has a feature that will detect movements of objects in 8 different areas on the screen. The camera detect an object’s movement by sensing display of outline, brightness levels and color. The camera sends a detection signal out via MD output terminal and will zoom into a pre-determined point.
1. Please press the SETUP button.
   - OFF : MOTION DETECTION mode is cancelled.
   - ON : Any motion in the selected areas is objected.
   - AREA SEL : You can select the area you wish to observe from the 8 area.
   - SENSITIVITY : You can select low or high level.
     When SENSITIVITY is high, Motion detection sensitivity is increased to recognize even small movement.

- SMART ZOOM : Smart zoom is operated in connection with MOTION. When the SMART ZOOM function is 'ON' while the MOTION DETECTION mode is 'ON', the zoom goes to the TARGET ZOOM position once motion is detected. Once the zoom action is finished and 'DWELL TIME' has passed, the zoom returns to the 'SMART ZOOM' position.

- START ZOOM : By moving the left or right button in the 'START ZOOM' item to select the zoom position from 1x to 27x (or 33x, 37x) to be returned after the 'SMART ZOOM' action is over.

- TARGET ZOOM : Use the left or right button in the 'TARGET ZOOM' item to select the zoom position from 1x to 27x (or 33x, 37x) to be used during MOTION DETECTION.

- DWELL TIME : Use the left or right button in the 'DWELL TIME' item to select a time between 5 and 60 seconds for the dwell time before the zoom is returned to the 'START ZOOM' position. (5, 7, 10, 15, 20, 30, 40, 60 sec)

---

**Tips on using the Motion Detection Feature:**
- The feature may not function properly under flickering light conditions.
- The camera interprets sudden changes in lighting and subsequent change in brightness of an object as motion.
- With the feature enabled, other algorithms may require additional time to operate.
- This system does not guarantee prevention of fire or theft. The manufacturer shall not be held responsible for any accident or damage incurred.
FOCUS

This product has a feature that will detect movements of objects in 8 different areas on the screen. The camera detects an object’s movement by sensing display of outline, brightness levels, and color. The camera sends a detection signal out via MD output terminal and will zoom into a pre-determined point.

1. Press the SET button to access the main setup menu and then position the indicator over FOCUS using the UP or DOWN button.
2. Press the SET button.
   - MODE: You can select the most suitable zoom mode. Move the arrow indicator to ‘MODE’ using UP or DOWN button.

- AUTO: Select AUTO and press the SET button to confirm. Increase or decrease optical zoom (ZOOM) or digital zoom (D-ZOOM) positions using the UP or DOWN button while verifying the changes on screen. Enabling D-ZOOM (ON) means that digital zoom will activate once optical zoom ends. The focus automatically adjusts when the lens zooms in and out.
- **ONE PUSH**: Focus is automatically adjusted just one, after Zoom position is changed. Select ‘ONE PUSH’ and the SET button to confirm. Increase or decrease optical zoom (ZOOM) or digital zoom (D-ZOOM) positions using the directional buttons while verifying the changes on screen. Press the SET button once the desired image quality is obtained.

- **MANUAL**: Select ‘MANUAL’ and press the SET button to confirm. Increase or decrease optical zoom (ZOOM) or digital zoom (D-ZOOM) positions moving directional buttons while verifying the changes on screen. Press the SET button once desired image quality is obtained. Focus can be manually adjusted, independent of moving zoom.

- **ZOOM TRACK**: Select ‘ON’ for the ‘SMART ZOOM’ item in the MOTION DETECTION menu and press SET button to change the settings for the ‘SMART ZOOM’ function.

Use the left or right button in the ‘ZOOM’ item to select ‘AUTOTRACK’ or ‘TRACK’ and press SET button to activate the zoom action focus function.

- **AUTO TRACK**: Zooming in while deciding or adjusting the status of the focus.
- **TRACK**: The camera moves the focus track which is established.
- **OFF**: Only the zoom lens moves.
ZOOM SPEED: Configure zoom tracking speed using this feature. Position the indicator over ‘ZOOM SPEED’ using the UP or DOWN button and then set to desired mode using the LEFT or RIGHT button.

- FAST: To move zoom fast.
- SLOW: To move zoom slowly.
- MEDIUM: To move zoom at medium speed.

D-ZOOM: Configure magnification limit from x2~x16 using this feature. Position the indicator over ‘D-ZOOM’ using the UP or DOWN button set ‘D-ZOOM’ to ‘ON’ and press the SET button to confirm.

- Set ‘ZOOM LIMIT’ to the desired level using the LEFT or RIGHT button.

Notes

- When the DIS is enabled, you cannot use the D-ZOOM.
## Operating Your Camera

- **ZOOM POS INIT**: Moves to the controlled ZOOM position when the power is turned on and the initial ZOOM position has been set.

  - **AUTO**: If you turn the power off and on, the zoom magnification level is set to the previous level that was set before the power went off.

  - **MANUAL**: The zoom magnification level can be set from 1x to 27x (or 33x, 37x)

- **Notes**: The zoom position is saved after 5 seconds when you set zoom function.

- **USER PRESET**: Preset user-designed configurations using this feature. Position the indicator over ‘USER PRESET’ using the UP or DOWN button and then set to ‘ON’ using the LEFT or RIGHT button. Press the SET button to confirm.
- PRESET NO: Up to 128 preset configurations are supported.
- SAVE: Save configured preset.
- CLEAR: Clear configured preset.
- RETURN: Revert to the FOCUS SETUP menu.

Lens Init: Use the left or right button in the ‘Lens Initialization’ item select ‘Automatic’ or ‘Manual’ and then press the SET button.

- AUTO: the lens can automatically be set by a pre-selected day, from 1-day to 7-days. This will start from when the time is set.

- Manual: The lens will reset when you press
1. Press the SET button to access the main setup menu and then possible the indicator over ‘EXPOSURE’ using the UP or DOWN button.

2. Press the SET button to confirm.

**BRIGHTNESS** : Use this feature to adjust image brightness. Position the indicator over ‘BRIGHTNESS’ using the UP or DOWN button. Then increase or decrease brightness level using the LEFT or RIGHT button while verifying the changes on screen. Set END

**IRIS** : Set ‘IRIS’ to ‘AUTO’ or ‘MANUAL’. Position the indicator over ‘IRIS’ using the UP or DOWN button and then select the desired iris mode using the LEFT or RIGHT button.
- AUTO: The iris is automatically activated upon illumination.
- MANUAL: Manual iris configuration. Set 'IRIS' to 'MANUAL' using the LEFT or RIGHT button and then Press the SET button. Increase or decrease iris level using the LEFT or RIGHT while verifying the changes on screen.

SHUTTER: Control image brightness by adjusting shutter speed.
① Position the indicator over 'SHUTTER' using the UP or DOWN button. Then select the desired shutter mode (A.FLK, ESC, MANUAL) using the LEFT or RIGHT button.

- MANUAL: Manual shutter speed setting.
- A.FLK (NTSC: 1/100, PAL: 1/120): Flicker-free mode
- ESC: Automatic shutter speed setting (optional).
  Auto operation is possible only when the IRIS is set to MANUAL.

② If you choose 'MANUAL', select the optimal shutter speed.
- In MANUAL mode, the optimal shutter speed needs to be designed. Select from 1/60 to 1/120,000 (NTSC) or from 1/50 to 1/120,000 (PAL). * 'Sens-Up' mode can be configured manually (2x to 512x).
- Verifying changes made to the shutter speed by referencing to changes the 'on-screen' brightness.
③ Press the SET button to complete.
Operating Your Camera

AGC (Auto Gain Control) : For brighter images.
① Position the indicator over ‘AGC’ using the UP or DOWN button.
② Set ‘AGC’ to the desired mode using the LEFT or RIGHT button.
- HIGH : Wide range gain value adjustment.
- MANUAL : Selecting gain value range. (5dB ~ 41dB)
- OFF : Disabled
- LOW : Narrow range gain value adjustment
- MEDIUM : MEDIUM range gain value adjustment.

SSNR (Super Noise Reduction) : On screen noise reduction.
① Position the indicator over ‘SSNR’ using the UP or DOWN button.
② Set ‘SSNR’ to the desired mode using the LEFT or RIGHT button.
  ● LOW : Low noise reduction
  ● MEDIUM : Medium noise reduction
  ● HIGH : High noise reduction
  ● OFF : Disabled

- Image may become unstable if the camera is set to ‘ESC’ mode and faces a strong fluorescent light.
- Under ‘ESC’ mode, the brightness can be adjusted using the LEFT or RIGHT button.

Notes

- Changing the ‘AGC’ setting from LOW to HIGH results in greater sensitivity, as well as on screen noise.
- Setting ‘AGC’ to OFF locks ‘SSNR3’ configuration.
**SENS-UP**: This feature ensures clear images at night or under low light conditions.

1. Position the indicator over ‘SENS-UP’ using the UP or DOWN button.
2. Set ‘SENS-UP’ to the desired mode using the LEFT or RIGHT button.
   - **AUTO**: Select this mode for use in night time or under low light conditions.
   - **OFF**: Disabled

**Notes**

- Once ‘AUTO’ mode is set, the user can configure the SENS-UP limit by increasing/decreasing the shutter speed (e.g.: X2, X4, ..., X32, X64, X128, X256, X512).
- Enabling Sens-Up increases camera sensitivity and may result in additional noise and/or other phenomenon. This is normal.
1. Press the SET button to access the main setup menu and then position the indicator over ‘SPECIAL’ using the UP and DOWN button.
2. Press the SET button to confirm.

PRIVACY: Hide an area you want to hide on the screen.

① When the SPECIAL menu screen is displayed, using the UP or DOWN button so that the arrow indicates ‘PRIVACY’.

② Set the mode using the 4 direction buttons.
   - AREA SEL: You can select up to 12 areas,
   - AREA MODE: Determine whether to use the area selected in the AREA SEL,
   - MASK COLOR: Determine area color. You can select Green, Red, Blue, Black, White, Gray.
DAY/NIGHT: You can display pictures in color or black and white.

1. When the SETUP menu screen is displayed, select ‘DAY/NIGHT’ using the UP or DOWN button so that the arrow indicates ‘DAY/NIGHT’.
2. Select a desired mode using the LEFT or RIGHT button according to the picture display you want.
- AUTO: The mode is switched to ‘Color’ in a normal environment, but switches to ‘B/W’ mode when ambient illumination is low. To set up the switching time or speed for AUTO mode, press the SET button.
- COLOR: The picture is always displayed in color.
- B/W: The picture is always displayed in black and white.
- DWELL TIME: You can select the day/night switching delay time from → 5,7,10,15,20,30,40,60(sec)
- DURATION: You can select the day/night switching Point (Lux).

<table>
<thead>
<tr>

<td>1.2 Lux</td>
</tr>
</tbody>
</table>

※ When AGC is middle mode.

EXT: This mode allows you to apply a desired filter to external signals.

※ You can use day & night for BW with CDS sensor once connecting CDS terminal at the EX_DN mode.

※ When you use day & night with external signal directly by cables, you have to plug a jumper block into the CDS terminals with a CDS jack in the pack.
Operating Your Camera

Notes

- You cannot control the DAY/NIGHT menu when AGC in the EXPOSURE menu is ‘OFF’. At this time, the exchange between DAY mode and NIGHT mode operates as like selecting ‘COLOR’ mode.
- The OSD key does not work for 3 seconds when switching to Color or B/W to ensure stable camera operation.
- The camera may focus less under infrared illumination than under normal illumination.
- The brightness of illumination is changeable by installed environment.

DIS : The DIS mode can compensate for vibration of the camera.

SYNC : Two synchronization modes are available INTERNAL and EXTERNAL LINE-LOCK. In LINE-LOCK mode, it synchronizes the camera’s video out signal to the external SYNC signal.

Notes

- When DIS is operating, D-ZOOM does not operate.

SYNCH : Two synchronization modes are available INTERNAL and EXTERNAL LINE-LOCK. In LINE-LOCK mode, it synchronizes the camera’s video out signal to the external SYNC signal.
● INIT : Internal synchronization
● LL : External line-lock synchronization
  – If you choose ‘LL’, you can adjust the desired phase. Press the SET button.
  – You can adjust the desired phase from 0 to 359.

❖ COMM ADJ (Communication Adjustment) :
  This function sets up the camera communication status when controlling the camera though an external controlled device.
① When the SPECIAL menu screen is displayed, using the UP or DOWN button so that the arrow indicates ‘COMM ADJ’.
② Set up the mode moving the 4 direction of the SET button,
  – CAM ID : Determines the camera’s identification number (between 0 and 256).
  – BAUD RATE : You can select 2400 / 4800 / 9600 / 19200 / 38400 / 57600 bps.
  – UART MODE : You can select NONE, EVEN or ODD for the parity bits.
■ Operating Your Camera

- RET PKT: You can choose whether to send an ACK signal when the communication control command is issued to the camera.

❖ IMAGE ADJ: Includes image quality or special function factors.

① When the SETUP menu screen is displayed, select ‘IMAGE ADJ’, using the UP or DOWN button so that the arrow indicates ‘IMAGE ADJ’.

② Select desired mode using the LEFT or RIGHT button.
- H-REV: You can flip the picture horizontally on the screen.
- V-REV: You can flip the picture vertically on the screen.
- SHARPNESS: As you increase this value, the picture outline becomes stronger and clearer.
Monitor: Please change the settings value of video appropriate to your monitor.

- LCD: Please select this menu item when using an LCD monitor.

- CRT: Please select this menu item when using a CRT monitor.

- USER: Please use this menu item when using a monitor other than standard ones. You can change the gamma, PED level, and color gain in the sub menus.
### Operating Your Camera

**DISPLAY**: Use this feature to designate for the camera, which will display on the monitor screen.

#### SPECIAL SETUP

<table>
<thead>
<tr>

<td></td>
</tr>
</tbody>
</table>

**CAM TITLE**

1. Press the SET button to display the main setup menu and move the arrow indicator to ‘CAM TITLE’ using the UP or DOWN button.
2. Set ‘CAM TITLE’ to ‘ON’ using the UP or DOWN button.

#### Notes

- If the CAM TITLE feature is set to ‘OFF’, the name will not be displayed in the monitor.

3. Press the SET button.

---

**DISPLAY SETUP**

| CAM TITLE | OFF |
| CAM ID | ON |
| CAM INFO | ON |
| MOTION ALARM | OFF |
| ZOOM MAG | ON |
| FONT COLOR | WHITE |
| LANGUAGE | ENGLISH |
| RETURN | |

**CAMERA TITLE SETUP**

```
ABCDEFGHIJKLMNOPQRSTUVWXYZ
abcdefghijklmnopqrstuvwxyz
-0123456789
←→CLR POS END
```
You can enter up to 15 characters.
a. Move the cursor to the character entry field using the LEFT or RIGHT button.
b. Use the 4 direction of buttons to select a desired character.
c. Press the SET button to confirm the selection of the blinking character. The character is then saved and the cursor in the entry field moves to the next position.
d. Repeat steps ‘a’ though ‘c’ until the desired name has been entered.

Notes

• Correcting Mistakes
  Move the cursor the ‘CLR’ and press the Set button to clear the entire entry. To modify one character, use LEFT or RIGHT to position the cursor above the character to be modified and click the SET button after selecting to enter.

Enter a title, move the cursor to ‘POS’ and press the SET button. The entered title appears on the screen.
Select the position to display the title on the screen by moving the 4 direction buttons and press the SET button. When the position is determined, select.

- CAM ID : Displays camera ID on top left corner of the screen.
- CAM INFO : Displays camera information on screen.
- MOTION ALARM : You can toggle the use of the camera alarm.
- ZOOM MAG : Use this feature to display the current zoom magnification level on screen. Position the indicator over ‘ZOOM MAG’ using the UP or DOWN button. Then set to ON using the LEFT or RIGHT button.
- FONT COLOR : You can select the font color (white, yellow, green, red, blue).
- LANGUAGE : You can select the menu language according to your requirements(Korean, Espanol, Francais, Italiano, Deutsch, English, Japanese, Chinese, Russian, Cesky, Polski, Portuguese, Taiwanese, Romanian, Serbian, Swedish, Danish, Turkish)
- END : Select this to save the SPECIAL menu setting and return to the SPECIAL menu.

RESET
To reset your camera to factory default condition.

EXIT
To finish setup menu.
If you have trouble operating your camera, refer to the following table. If the guidelines do not enable you to solve the problem, contact an authorized technician.

● Nothing appears on the screen.
  ▶ Check that the power cord and line connection between the camera and monitor are fixed properly.
  ▶ Check that you have properly connected VIDEO cable to the camera VIDEO output jack.

● The image on the screen is dim.
  ▶ Is lens stained with dirt? Clean your lens with soft, clean cloth.
  ▶ Set the monitor to proper condition.
  ▶ If the camera is exposed to too strong light, change the camera position.

● The image on the screen is dark.
  ▶ Adjust the contrast feature of the monitor.
  ▶ If you have an intermediate device, set the 75Ω / Hi−z properly.

● The camera is not working properly, and the surface of the camera is hot.
  ▶ Check that you have properly connected the camera to an appropriate power source.

● The SENS−UP function does not work.
  ▶ Check that AGC of EXPSURE SETUP menu is ‘OFF’.
  ▶ Check that SHUTTER of EXPOSURE SETUP menu is ‘A,FLK’ or ‘MANUAL’.

● The Motion Detection function does not work.
  ▶ Check that MOTION DET of SPECIAL SETUP menu is ’OFF’.

● Color is not correct.
  ▶ Check the setting of WHITE BAL SETUP menu.

● The screen flickers continually.
  ▶ Check that direction of camera turns toward the Sun.

● When coaxial communication is not available:
  ▶ Make sure that the camera and monitor are installed within the recom mended distance.
  ▶ Use the video amplifier equivalent to coaxitron if the recommend installation distance is exceeded.
