Dynamic **CCTV** **Ltd**

How to upgrade the firmware
on the EZHD DVR

Firmware Uprage Process

If you wish to upgrade the firmware of your EZH DVR to a more up to date version please follow the steps bellow

You will need a PC, a blank USB memory stick (any size)and connection to the internet to complete the following

1, Before you begin you will need to download the Upgrade to your USB stick :
Technical Support - >**Manuals & Software** - >**DVR** - >**DYNAMIC** - >**EZHD 4/8/16** - >**Latest Firmware**

2,Click the **"Latest Firmware"** link and when prompted save the file to your USB stick

3, Once downloaded locate this file on your USB stick and double click it, this will open up a new screen select **"Extract"**

4, Once the extraction process is complete remove your USB stick and insert it into the front USB slot in your EZHD DVR

5, Enter the onscreen menu of the DVR and select the first option labelled "SYSTEM" and then the first option again labelled "**VERSION**"

6, Once in the VERSION submenu you need to navigate to the last option labelled "**FIRMWARE UPGRADE VIA LOCAL DEVICE**" and press enter. The DVR will now check the USB stick for a valid firmware version, while this is happening the screen will read "**BUILDING LIST**" after a short wait the firmware version number will appear on screen with the word "NO" below it, you need to press **ENTER** to select it (it should start to flash) and press **UP** to change it to "**YES**" press **ENTER** once more to begin the upgrade. While upgrading you will see the "**UPGRADE IN PROCESS DO NOT POWER OFF OR REBOOT**" after a short wait the message will change to "**UPGRADE OK SYSTEM REBOOTING**" the unit will now reboot and be fully upgraded with the latest firmware.
