You set the customer price

No mark-up restrictions. Typically, integrators add between 30-100% margin depending on price sensitivity of customer.

Annual plan discounts

Sign up for 12 months upfront and only get charged for 10.

¹ Each Cloud Adapter can support up to 8 camera channels in medium to heavy usage environments or up to 12 channels where there is relatively little motion activity.

² Prices shown assume an average of 6 hours of motion events are uploaded per camera per day. If usage exceeds this, Videoloft may increase the price or reduce video bitrate following a discussion with the installer.

³ Please ensure there's sufficient bandwidth at the location to support 24/7 recording. Full video will be available to view online only.
